

Audio Needs for “The White Robe”

Dear Audio Person

Thank you in advance for your help with our show which is soon coming to your church. We have some basic audio needs that we trust will not pose too great a complication for you.

Channels

We will need 4 audio channels to make our show run properly. We bring all the equipment for these with us, but will need you to handle the ultimate mix.

Channel 1: Wireless Sennheiser Lav wired into the hair of our Actor
Receiver Location: Anywhere that suits you best

Channel 2: Wireless Sennheiser Lav wired into the hair of our Actress
Receiver Location: Anywhere that suits you best

Channel 3: DVD 1 audio out through our DI Box
DVD Location: On the platform

Channel 4: DVD 2 audio out through our DI Box
DVD Location: On the platform

A few notes:

- The actors are trained to use the mute buttons on their mics, so there is no need to lower their levels at any time.
- The DVDs are designed to run on a flat EQ, but please tweak if you see a need.
- Please feel free to mix the best levels between mic and DVD as this changes for each room we are in.
- The DVD is the first thing in the show, so please make sure it is hot right off the top
- There a final short DVD after the end of the show
- Please arrange a sound check at least 1.5 hours before the show.

That’s it. If you have any questions, please feel free to contact our Road Manager directly at 519-504-7304 or at nseiling@seeds.org.

Thanks Again.

The Good Soil Theatre Team
